Where can I find energy statistics data? Data is now available through the .Stat Data Explorer, which also allows users to export data in Excel and CSV formats. Coal also includes peat and oil shale where relevant. Also includes geothermal, tide, ocean and wave energy. Energy Statistics Data Browser - Data tools. A data tool by the International Energy Agency. Does EIA publish gross generation data for battery and pumped storage applications? In October, EIA started publishing gross generation data for battery and pumped storage applications in its detailed electric power survey. Another new table provides capacity factor data based on gross generation for pumped storage and batteries. How is electricity data collected? Data is collected from multi-country datasets (EIA, Eurostat, BP, UN) as well as national sources (e.g. China data from the National Bureau of Statistics). Our yearly electricity data is kept up to date throughout the year and is regularly amended with the latest available data. How will energy storage affect global electricity production? Global electricity output is set to grow by 50 percent by mid-century, relative to levels. With renewable sources expected to account for the largest share of electricity generation worldwide in the coming decades, energy storage will play a significant role in maintaining the balance between supply and demand. What is electric power monthly? The U.S. Energy Information Administration's (EIA) Electric Power Monthly now includes more information on usage factors for utility-scale storage generators as well as a monthly and an annual series on the total available capacity for several power plant technology types. Capacity factors measure how intensively a generating unit runs. How can energy storage support the transition to clean electricity? With renewable sources expected to account for the largest share of electricity generation worldwide in the coming decades, energy storage will play a significant role in maintaining the balance between supply and demand. To support the global transition to clean electricity, funding for development of energy storage projects is required.
