Why do you need warranty insurance for your energy storage system? Our warranty insurance solutions help to secure your sustainable business in the long run. Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more. Do you offer power generation insurance? We offer insurance coverages for a range of operational risks that owners of power plants may face on a daily basis. Our Power Generation insurance is suited for a variety of energy businesses, including the operators of steam and gas turbines, desalination plants, and hydroelectric, geothermal, wind and solar plants. How long do energy storage systems last? Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more. As a manufacturer and system integrator you have to provide your customers with warranties. Why do we need reliable energy storage systems? Renewables like wind and solar energy are intermittent by nature. To successfully master the energy transition, reliable energy storage systems are a must to provide the necessary supply stability. What are the features of power generation insurance? Our Power Generation insurance features include: Target Markets: Renewables: Line size: Up to USD 125 million Territories: Worldwide Very user friendly and responsive team. They are commercial in their approach and responsive urgent client requirements so we are always happy to recommend them Battery Energy Storage System (BESS) Insurance | Travelers Travelers understands the unique risks energy storage customers face and offers a selection of specialized coverages and risk management solutions to help renewable energy businesses Electrical Energy Storage Systems Insurance | Munich Green Tech Solutions pools expert resources and know-how in the field of renewable energies.
