Do battery storage technologies use financial assumptions? The battery storage technologies do not calculate levelized cost of energy (LCOE) or levelized cost of storage (LCOS) and so do not use financial assumptions. Therefore, all parameters are the same for the research and development (R&D) and Markets & Policies Financials cases. Do material prices affect the cost structure of a lithium-ion battery cell? By discussing different cell cost impacts, our study supports the understanding of the cost structure of a lithium-ion battery cell and confirms the model's applicability. Based on our calculation, we also identify the material prices as a crucial cost factor, posing a major share of the overall cell cost. How is battery production cost measured? Battery production cost can be measured by full, levelized, and marginal costs. Several studies analyze the full costs, but the components are not clearly defined. For example, capital costs and taxes are omitted by most authors. How much does a lithium battery cost? Reported cell cost range from 162 to 435 \$ (kW h)<sup>-1</sup>, mainly due to different requirements and cathode materials, variations from lithium price volatility remain below 10%. They conclude that the trend of lithium price increases will have limited impact on the battery market and future cost reductions. What is a battery chemistry cost model? It calculates battery cell and pack costs for different cell chemistries under a specified production volume within a pre-defined factory layout and production process. The model is frequently used, adapted, or extended by various authors 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18. What are base year costs for utility-scale battery energy storage systems? Base year costs for utility-scale battery energy storage systems (BESSs) are based on a bottom-up cost model using the data and methodology for utility-scale BESS in (Ramasamy et al., ). The bottom-up BESS model accounts for major components, including the LIB pack, the inverter, and the balance of system (BOS) needed for the installation.
