Are liquid air energy storage systems economically viable?"Liquid air energy storage" (LAES) systems have been built, so the technology is technically feasible. Moreover, LAES systems are totally clean and can be sited nearly anywhere, storing vast amounts of electricity for days or longer and delivering it when it's needed. But there haven't been conclusive studies of its economic viability. Could liquid air energy storage be a low-cost option?New research finds liquid air energy storage could be the lowest-cost option for ensuring a continuous power supply on a future grid dominated by carbon-free but intermittent sources of electricity. Is liquid air storage feasible?While LAES is technologically feasible, its economic feasibility will determine its future. The team of researchers stressed the need for further development of the technology amidst the shifting energy landscape. "This is why the story of liquid air storage is far from over. What is liquid air energy storage?Liquid air energy storage (LAES) is a technology that converts electricity into liquid air by cleaning, cooling, and compressing air until it reaches a liquid state. This stored liquid air can later be heated and re-expanded to drive turbines connected to generators, producing electricity. Could liquid air unlock a new opportunity for long-duration energy storage?The world's most available substance could unlock a new opportunity for long-duration energy storage. Liquid air refers to air that has been cooled to low temperatures, causing it to condense into a liquid state. Credit: Waraphorn Aphai via Shutterstock. When was liquid air first used for energy storage?The use of liquid air or nitrogen as an energy storage medium can be dated back to the nineteenth century, but the use of such storage method for peak-shaving of power grid was first proposed by University of Newcastle upon Tyne in . This led to subsequent research by Mitsubishi Heavy Industries and Hitachi . "10????????,?????????????" ??????(Liquid Air Energy Storage, LAES)????????????????,????????????????????????????????
