Can you use a power station while RVing? Still, thanks to larger battery packs and more efficient solar panels, portable power stations have become viable options for use while RVing. Whether it's a primary source of power or a backup for your main generator, a power station can be a handy item to have at your disposal. How do you charge a power station in an RV? Fortunately, there are multiple ways to recharge most power stations. In addition to plugging them into an AC wall outlet at home, most models can also charge using the 12-volt DC port found in your RV. The majority of these devices can also be powered up using a solar panel, which is handy when used in the field.

Why should you choose an RV storage facility? 1. Avoid legal issues- this includes paying big fines from different authorities that govern your neighborhood or city. 2. Avoid vandalism or theft- you get better security at an RV storage facility, in most cases, thus your RV or trailer will be safe while you are occupied with your normal daily living. 3. Should I store my RV without electrical power? The positive aspect of storing your RV without electrical power is that you save money. This can be a hard decision to make.
